

SAJEETHA S

MERN Stack Developer | Software Engineer | AI-Integrated Applications

+91 8667731683 | sajeethasasidharan@gmail.com | [linkedin.com/in/Sajeetha-S](https://www.linkedin.com/in/Sajeetha-S) | github.com/Sajeetha-S | Coimbatore, Tamil Nadu

PROFESSIONAL SUMMARY

MERN Stack Developer and B.Tech IT graduate (2026) with a peer-reviewed paper in IJERT (2026) and 4 deployed full-stack projects spanning AI/NLP, health analytics, inventory management, and automated recruitment systems. Skilled in React.js, Node.js, MongoDB, Express.js, Python, and SQL with hands-on experience in REST API design, JWT authentication, and data-driven application development. Consistently ships complete, scalable solutions independently — from system design to deployment.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap

Backend: Node.js, Express.js, Flask, RESTful APIs

Database: MongoDB, MySQL, SQL

AI / Data: Python, Pandas, NumPy, Matplotlib, Seaborn, NLP (spaCy/NLTK), LLM, Power BI,

Tools: Git, GitHub, VS Code, Jupyter Notebook, Figma, Postman, npm, Vercel (deployment)

TRAINING

MERN Stack Development + SQL | Besant Technologies, Velachery, Chennai

Feb 2026 – May 2026

Completed MERN Stack training covering MongoDB, Express.js, React.js, Node.js, SQL, JWT authentication, and REST API design.

INTERSHIP

Python & Data Analytics Intern | Accent Techno Soft, Coimbatore

Jun 2025– Jul 2025

- Performed end-to-end exploratory data analysis on real-world business datasets using Pandas and NumPy; produced 12+ visualisation charts with Matplotlib and Seaborn that surfaced actionable trends- **(Sleep Health Analysis)**

PROJECTS

AI-Powered Mental Health Chatbot | Flask, Google Gemini 2.5 Flash, Python, HTML/CSS/JS

- Architected a 2-phase conversational AI system: a structured 5-question mental health assessment followed by an open-ended empathetic dialogue engine, achieving 100% safety compliance across all evaluated responses with zero diagnostic statements.
- Integrated Google Gemini 2.5 Flash API with prompt engineering to ensure zero diagnostic statements — 100% safety compliance across evaluated responses.

Smart Resume Analyzer | Python, Flask, NLP, React.js

- Designed the scoring algorithm that extracts technical skills from uploaded resumes, matches them against job descriptions, and generate ranked candidate relevance scores — replacing manual HR screening with automated ranking.

Inventory Management System | React.js, Node.js, MySQL

- Designed a RESTful API backend with relational database integration, boosting efficiency in stock monitoring and ensuring scalable, user-friendly inventory management.

Sleep Health Analysis | Python, Pandas, Matplotlib, Seaborn

- EDA and visualization of real-world sleep health dataset across multiple countries; produced 10+ insight charts.

PUBLICATION

- "AI-Powered Mental Health Chatbot"** — International Journal of Engineering Research & Technology (IJERT), 2026.
Focus : Accessible emotional support via conversational AI, privacy-first architecture, LLM prompt engineering.

CERTIFICATIONS

- SQL (Basic, Intermediate, Advanced) – HackerRank (Feb 2026)
- Web Application Development using React.js – Microsoft (Mar 2024)
- Introduction to Machine Learning – Great Learning (Oct 2023)
- Blockchain Beyond Cryptocurrency – NCCSASS'25:Hindusthan Institute of Technology (Mar 2025)

ACHIEVEMENTS

- Winner – Project Presentation (NERDINA): Webpage Creation for Restaurant (Feb 2023)
- Runner-up – Mini Project Presentation (NERDINA): Home Security Alarm (Feb 2023)

EDUCATION

B.Tech – Information Technology | PPG Institute of Technology

2022-2026

CGPA: 8.35

HSC | Unique Public School, Ooty — 75%

2021-2022

SSLC | Mahatma Gandhi Matriculation School, Ooty — 98%

2019-2020
